

Foundation Degree Science (FdSc): Retail Asset Management

Programme Specification 2017-
2018

Summary Programme Details

Final Award	
Award:	Foundation Degree Science (FdSc)
Title of (final) Programme	Retail Asset Management
Credit points:	240
Level of award (QAA FHEQ):	5
Intermediate award(s)	
Intermediate award 1:	Certificate of Higher Education (Cert HE): Retail Property Management
Credit points:	120
Level of award (QAA FHEQ):	4
Intermediate award 2:	None
Credit points:	
Level of award (QAA FHEQ):	
Validation	
Validating institution:	University College of Estate Management (UCEM)
Faculty	Management and Vocational
Date of last validation:	22nd March 2016
Date of next periodic review:	5 years post-validation
Professional accreditation	
Recognising body:	Royal Institution of Chartered Surveyors (RICS) (The UCEM Foundation Degree Retail Asset Management qualifies holders to 2 years of the experience requirement for AssocRICS for the Commercial Property Management pathway.) British Council of Shopping Centres (BCSC) (TBC) International Council of Shopping Centres (ICSC) (TBC)
Date of last recognition:	N/A
Date of next periodic review:	N/A

Date of commencement of first delivery	October 2016
Duration	3 years
Maximum period of registration	10 years
UCAS Code	N/A
Programme Code	UFDRAMS
Other coding as required	Period Codes USM10 and USM04

Programme Overview

Rationale

The proposed Foundation Degree (FdSc) is a fully supported on-line learning experience that is designed to appeal to a very broad spectrum of students.

The programme:

- provides a higher education entry point for students who currently do not have the relevant qualifications, or aspiration, to enroll onto an Honours Degree programme;
- develops appropriate and relevant knowledge, skills and techniques through a combination of academic study and work based learning. This aims to foster reflective practice and critical analysis of experience gained and (where appropriate) competence developed through problem-solving activity;
- meets the needs of students and their employers in the retail property and asset management sectors. It also caters for students not employed in this sector or unemployed;
- provides a progression opportunity to UCEM's BSc in Real Estate, and programmes at other higher education institutions, in order to acquire Level 6 estate management related qualifications.

Entry requirements

Foundation Degree

Entrants to this programme are normally required to have attained one of the following:

- GCSE Grade C or above in English and Mathematics (Grade 4 for applicants holding newly reformed GCSEs in England);

Or,

- A Level 2 qualification in English and Mathematics as defined by the National Qualifications Framework for England, Wales and Northern Ireland (QCF). For example the following qualifications can be considered for entry: Key Skills level 2, NVQ level 2, Skills for Life level 2, BTEC award, certificate or diploma level 2, Functional skills level 2, Cambridge National level 2, Cambridge Technical level 2. The academic level of International qualifications will be assessed using UK NARIC. For more information on equivalent qualifications please contact: admissions@ucem.ac.uk.
- Applicants are normally expected to be 18 years old or over. Applicants under the age of 18 will be considered on a case by case basis by the Programme Leader.

If a student does not meet the standard entry requirements, UCEM will consider the application on an individual basis. In these cases, a student's application will be assessed by the Programme Leader who will give careful consideration to any professional and life experiences, as well as any academic or vocational qualifications the student may hold. The student may be asked to provide a detailed personal statement and/or a reference or letter

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

of support from an employer or mentor to support the application.

International applicants must meet UCEM's minimum English language requirements in addition to the programme entry requirements listed above. For English language requirements please go to: <https://www.ucem.ac.uk/study-with-ucem/international-students/language-requirements/>

Recognition of prior certificated learning (RPCL) or recognition of prior experiential learning (RPEL) routes into the Programme

RPCL and RPEL routes are supported with the requirements being outlined within UCEM's various Codes of Practice, including the Code of Practice on Admissions and Recognition of Prior Learning (Section 12).

Programme progression

- On successful completion of Part 1 of the Foundation programme, a Certificate of Higher Education will be awarded to those who exit the programme.
- Assessment and Progression are conducted in accordance with the current UCEM Academic and General Regulations for Students and the UCEM Undergraduate Assessment, Progression and Award Regulations.
- Students may be allowed to progress at an advanced level onto UCEM's BSc Programmes. The level of entry into the BSc will be dependent on a student's prior performance, diet of modules passed and specialist BSc selected. Consideration here will be on given on the prior award level (Pass, Merits or Distinction) and the mapping of prior learning outcomes.

Award Regulations

- On successful completion of the Foundation Degree (FdSc) shall, on the basis of a student's performance, be awarded to those who complete the programme
- Awards are conferred in accordance with the current UCEM Academic and General Regulations for Students and the UCEM Undergraduate Assessment, Progression and Award Regulations.

Career prospects

Foundation Degrees, as well as Certificates, are a springboard for further study and / or entry into the professional workforce. This programme equips students with the essential subject knowledge and study skills to enable them to enter and work within the retail property and asset management areas of practice within the property industry. The opportunities available are fairly extensive and include but are not limited to the following career paths:

- Shopping Centre Management,
- Contract management,
- Retail Asset Management,
- Project management,
- Property agency and management,
- Property development.

Programme Aims

Programme aims

The UCEM Foundation Degree (FD Sc) is designed to provide access to higher education study for a wide range of applicants. These may include those who wish to enter the retail asset management profession but lack the appropriate academic qualifications, those who already work in the industry seeking career progression and recognition and those who are self-employed and require more formal and/or professional qualifications.

The programme provides flexibility and breadth of study opportunities for students whilst aligning this programme with UCEM's wider academic offer. It aims to:

- develop students' ability to engage with the professional environment in order to critically analyse, synthesize and report on business issues within the context of the retail asset sectors;
- provide and enhance an awareness of the importance of ethical standards within the profession;
- expose students to the various global information systems and software available for managing various aspects of their work within the built environment;
- provide both current and aspiring built environment, property and asset management and project management professionals with an opportunity to develop appropriate skills and competencies in an area of retail asset management that allows them to further enhance their careers, including achievement of membership of relevant professional bodies;
- provide an educational programme that is sufficiently flexible to give access to appropriately motivated students to allow them entry onto an Honours degree programme.

The Foundation Degree (FdSc) lends itself to advanced placement should students ultimately wish to enrol onto a Bachelor's or Master's degree programme.

Market and internationalisation

Indicators are bullish in respect of the demand for trained and qualified staff within the shopping centre sector. For the first time since the onset of the recession, development pipeline showed a positive return and is set to grow over the next two years. The recession has brought about a focus on the effective management of property assets with key themes being efficiency and adding value. This has translated into the focus upon all levels of management and especially the added value derived from site-based management teams.

At present, the ICSC is the only other organisation globally providing a structured programme of study within this industry sector. The proposed product differs from the ICSC programme inasmuch that it is more general in approach, covering the key aspects of shopping centre management and focussed on the UK/European concept and style of shopping centre management which is more appropriate to students. A breakdown of the ICSC programme is attached within the appendices.

In terms of age profile; the programme, at entry level, is expect to attract applications both from mature candidates with industry experience who want a professional qualification and

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

recognition, as well as new entrants to the industry at post 'Apprenticeship' level.

As with the programme's predecessor, the BCSC Diploma in Shopping Centre Management, it is anticipated that the majority of students on this programme will be between 25 and 45 years of age, working full-time and have little or no prior higher education experience. The aim of the programme is to develop a greater knowledge and understanding of property and asset management, specifically within the retail sector of the property industry.

It has been identified that this programme would be of interest to people within both the property and potentially the retail industries. Membership of the British Council of Shopping Centres currently exceeds 2,600. Additionally, as of 2015, the Royal Institution of Chartered Surveyors (RICS) has accredited over 118,000 people globally;

- United Kingdom 75,733
- Republic of Ireland 2,393
- Europe 6,751
- Middle East and Africa 2,772
- Hong Kong 4,735
- China 7,732
- Australia 1,961
- USA 1,484

Recognition: It is anticipated that subject to agreement to recognise the programme, the ICSC and BCSC will act as feeder organisations. It is also anticipated that the RICS will act as a feeder organisation.

UCEM has a long-standing reputation for delivering programmes within the built environment on an international basis. International students will be specifically supported by the use of International Case Studies, highlighting the cultural differences between different retail markets and methods of business establishment and trading. Where there is specific information which deals with regulations, law, financial standards and taxation, the use of PSRS's within the market will be considered, as well as partner employer local offices. It is the intention of the programme to engage international guest speakers for on-line activities such as webinars, programme seminars etc. Other opportunities for students to understanding the industry may arise during the delivery of this programme, such as CPD events, field trips etc. UCEM have offered and continue to offer a range of CPD events to students to enhance their studies, both in the UK and outside. Opportunities for other events including field trips will be considered as and when they become available.

Learning Outcomes

	Level 4	Relevant modules
A – Knowledge and understanding	A4.1 Establish the scope and workings of the retail assets industry and differentiate between the various professions working in the industry.	Introduction to Real Estate Practice Marketing the Retail Asset

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

B – Intellectual skills	A4.2 Evaluate and compare the general concepts of marketing and promotion of retail assets. A4.3 Identify methods by which resources and the companies working in the industry are managed.	Introduction to Real Estate Practice People & Organisational Management
	B4.1 Examine the contractual implications upon the management of assets. B4.2 Apply prescribed techniques to examine and analyse key concepts in case studies provided.	Contract & Lease Management Introduction to Real Estate Practice Technical & Professional Communication People & Organisational Management Marketing the Retail Asset
C – Subject practical skills	C4.1 Evaluate, critique and communicate concepts relating to the industry to peers. C4.2 Analyse possible solutions to maximise retail assets value.	Technical & Professional Communication Marketing the Retail Asset Marketing the Retail Asset Multi-Channel Retailing
D – Key / Transferable skills	D4.1 Manage and evaluate the development of one’s own learning. D4.2 Evaluate and perform various numerical techniques. D4.3 Illustrate various methods of communicating information. D4.4 Critically evaluate and solve problems within guided environments.	Portfolio of Learning from the Workplace. Valuation Context & Principles Technical & Professional Communication Portfolio of Learning from the Workplace Valuation Context & Principles

	Level 5	Relevant modules
A – Knowledge and understanding	A5.1 Comprehension of the fundamental principles of retail asset management and the way in which the principles have developed. A5.2 Understanding of the techniques and technology required for managing a range of buildings and their associated services.	Retail Asset Development, Sustainability and Simple Construction Global Retail Operations Valuation Context & principles

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

	<p>A5.3 Awareness of the legal and regulatory background to working in the industry.</p> <p>A5.4 Understanding of appropriate organisational and financial management processes.</p>	<p>Operational Facilities Management</p> <p>Portfolio of Learning from the workplace</p> <p>Professional & Statutory Regulation</p> <p>Operational Facilities Management</p> <p>Global Retail Operations</p> <p>Valuation Context & Principles</p> <p>Retail Asset Development, Sustainability & Simple Construction</p>
<p>B – Intellectual skills</p>	<p>B5.1 Synthesise learning throughout the range of subject areas covered.</p> <p>B5.2 Apply underlying concepts and principles outside the context in which they have studied, including the application of those principles in an employment context.</p> <p>B5.3 Transfer appropriate knowledge and skills from one topic within a subject to another topic.</p>	<p>All</p> <p>Portfolio of Learning from the Workplace</p> <p>Portfolio of Learning from the Workplace</p> <p>Professional & Statutory Regulations</p> <p>Portfolio of Learning from the Workplace</p>
<p>C – Subject practical skills</p>	<p>C5.1 Collect, record, present and manipulate data logically.</p> <p>C5.2 Use the main methods of enquiry to evaluate the appropriateness of different approaches to solving a range of tasks arising in professional practice.</p> <p>C5.3 Recognise the limits of knowledge and how this influences analysis and interpretations based on that knowledge.</p>	<p>Valuation, Context & Principles</p> <p>Technical & Professional Communication</p> <p>Global Retail Operations</p> <p>Portfolio of Learning from the Workplace</p> <p>Portfolio of Learning from the Workplace</p>
<p>D – Key / Transferable skills</p>	<p>D5.1 Communicate and collaborate effectively using a range of media.</p> <p>D5.2 For students to work under their own initiative and manage their time efficiently.</p> <p>D5.3 Solve problems and make decisions through reflective thinking and critical analysis.</p>	<p>Technical & Professional Communication</p> <p>All</p> <p>Portfolio of Learning from the Workplace</p> <p>Global Retail Operations</p> <p>Portfolio of Learning from the Workplace</p>

	Operational Facilities Management
Oct	Retail Asset Development, Sustainability and Simple Construction
	Global Retail Operations

However, it is possible to study either more or fewer modules in each semester. Students' can take single modules at a time over a longer period of time as long as the programme is completed within the period of registration.

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

Module Summaries

Please also see the separate module descriptors, available on the VLE for more detailed module information.

Technical and Professional Communication

This module consolidates students' existing knowledge and communication skills and enhances such skills as a sound basis for the study of the other modules included in the programme.

People & Organisation Management

This module seeks to:

- explain the role and function of management within organisations in the construction, land and estate management industries, both public and private sectors,
- explore the question "what is management?" and distinguish it from leadership,
- consider the role of change as a central theme as organisations seek to come to terms with issues that are constantly impacting, both positively and negatively, on the people, management and the structures of businesses,
- consider contemporary organisational behaviour as applied to the relevant sectors of industry.

Marketing the Retail Asset

This module provides an outline of the principles of marketing, which, in the contemporary competitive retail environment, is assuming ever increasing importance. The module considers retail assets becoming a brand in their own right and explores brand image development and exploitation. The module explores the many disciplines which contribute to the effective marketing of shopping centres from a business to business and business to consumer perspective, covering such topics as leasing, communications, public relations, mall events and promotions, new research techniques, e-commerce, permission marketing, customer relationship management and customer services.

Multi-Channel Retailing

This module provides an insight into retailers and the dynamic retailing methods and their application in retail and retail-led asset classes. This will provide the knowledge and understanding of retailing, the appreciation of which is an essential skill for retail asset and shopping centre management. This module explores the world of retail and seeks to improve the understanding of how retail works and what makes retailers tick. Students will develop their understanding of retailing and how this is important for store managers. Additionally, the module will explore areas of customer service provided by the shopping centre and how such a service benefits both the retailer and the landlord.

Introduction to Real Estate Practice

This module introduces the main principles of practice and law relevant to the efficient management of commercial property.

The module focuses primarily on the management of leases but also introduces the different bases of building measurement used and basic rental appraisal.

Contract & Lease Management

This module provides the knowledge to enable students to understand common basic English legal problems relating to contracts and leases including such matters as termination

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

of leases and the liabilities of both landlord and tenants.

Global Retail Operations

This module provides an insight into global retailer operations and the methods and their application in retail and retail-led asset classes. It provides the knowledge and understanding of retailing, the appreciation of which is an essential skill for retail asset management and senior management of shopping centres.

This module explores the processes employed to achieve operational excellence. It will focus on:

- lean retail,
- frontline operations,
- multichannel and online operations,
- franchise and licensing,
- retail real estate.

Retail Asset Development, Sustainability and Simple Construction

This module provides an introduction to retail asset development, sustainability and the management of simple construction and retail fit-out. It comprises: communicating, simple building parameters in small works projects and the management of retail fit-out.

An overview of the retail development process from feasibility through to operational launch is provided. Reference will be made to sustainability and product life-cycle planning throughout the development and setting to work process. The simple construction element will explore the aspect of managing the tenant fit-out process.

Professional & Statutory Regulation

This module introduces critical aspects relating to professional conduct and aims to develop students' professional skills in preparation for professional membership.

Operational Facilities Management

This module aims to:

- provide the student with a good appreciation of the function and scope of facilities management (FM) and its relevance and importance to business management practice,
- facilitate an understanding of the benefits that can accrue to business performance through devising, implementing and managing an FM strategy,
- develop in the student an initial understanding of the breadth of issues within facilities management,
- explore the underlying methods and approaches utilised by facilities managers,
- show how a business can benefit from creating a synergy between the role of the facility manager and those of the other typical business disciplines (e.g. real estate and construction).

Portfolio of Learning from the Workplace

This module requires students to demonstrate the relationship between relevant knowledge, skills and techniques acquired through the programme and the study of professional practice as derived from a workplace, and to communicate details of the experience gained and (where appropriate) competence developed through the preparation of a portfolio.

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

Valuation Context & Principles

This module sets property valuation in the broad economic and financial context, and examines the purpose of property valuations. It considers the stakeholders in the valuation process and regulatory, ethical and sustainability issues. It also provides an overview of the main valuation methodologies. This module aims to develop understanding of property as an investment; the property valuation process; the purposes of valuation; users of valuations; and the role of the RICS in regulating and guiding valuation members. It also addresses the nature of ethics and ethical issues with reference to the valuation industry and raises awareness of sustainability issues for property valuers.

Learning, Teaching and Assessment

Study support

Induction module:

All students are expected to complete the non-credit bearing, but compulsory, Induction Module before the programme commences. The Induction Module is designed to equip students with the skills they need to study at UCEM.

The induction topic about referencing prepares students for the online test in referencing and citation that must be completed and passed prior to commencement of their studies.

The resources within the Induction Module are available to students throughout the duration of their study with UCEM.

Student learning support:

The programme is delivered via UCEM's Virtual Learning Environment (VLE) and academic teaching and support is provided online giving student's access to UCEM tutors and other students worldwide.

UCEM's 'Student Central' function will act as the main point of contact for students throughout the duration of their programme. In addition, the programme has a dedicated programme administrator.

The academic team will guide and support students' learning. Furthermore, all students who do not engage with initial assessment or the VLE will receive additional support from the Programme team. Other UCEM administrative teams provide support for coursework, examinations and technical issues including ICT.

Each student, wherever their location, will have access to a wealth of library and online materials to support their studies. International students will be supported through international case studies and guest speakers from the region will be invited to UCEM's webinar delivery.

Support for specific learning needs is provided via a dedicated Disability and Wellbeing team at UCEM. Additional information can be found in the UCEM Background documentation.

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

English language support:

English is the common language for all programmes. It is appreciated that some students will need additional support. Therefore, the VLE provides additional resources on developing academic writing skills to help students whose first language is not English.

Personal and professional development:

This programme has been closely mapped to the RICS Commercial Property Management Pathway for Associate Membership (Copy attached as an appendix 'A' to this document.) The programme has RICS recognition, and it is UCEM's intention to seek accreditation from the BCSC and ICSC, post-validation. RICS have indicated that this programme is a valuable contribution to the academic offer within the field of the built environment.

Programme Specific support:

Each programme has a Programme Leader, Module Leaders and Module Tutors to support the students throughout their time with the programme. The UCEM staff are accessible during normal UK working hours, during which they also monitor the 24/7 forums asynchronously and provide encouragement, assistance and necessary tutor and student feedback services. Access to the UCEM e-Library is on a 24/7 basis and UCEM has a full time Digital Resources Manager available during normal UK working hours.

Learning & Teaching Strategy

Module delivery follows a standard format incorporating a range of subject-appropriate resources suitable for the online supported learner. This may include, but is not limited to, audio visual presentations, interactive case studies and online journals and subject relevant videos. Modules are supported by on-line access to subject specialist tutors, core texts and access to the UCEM e-library. This is provided by UCEM's Virtual Learning Environment (VLE).

Students are encouraged to develop and apply their knowledge and understanding through a range of online activities and exercises. These require students to apply their awareness and comprehension to simple industry related scenarios and issues.

Students are encouraged to share knowledge and ideas in relation to the retail property industry and their studies. A range of online activities require students to investigate and research given information and make reasoned decisions.

Teaching of module topics requires students' engagement with a range of on-line activities that develop communication and collaboration skills. The timing of these activities within the study period requires the development of effective time management skills.

Following close reference to the Framework documents sourced from the QAA and the FHEQ, a process of research has been undertaken involving a wide selection of sources including but not limited to; students (past and present), the Programme team of the FdSc (Surveying Practice) and employers. From the results of our research, the main emphasis of the programme is, firstly, based upon the essential subject knowledge and study skills required to equip students appropriately to enter employment within the retail property and asset management sector. Thereafter, the programme facilitates the opportunity for

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

students to register for membership of the appropriate professional body of their choice.

UCEM has always recognised the student as an individual with differing demands upon them from employment and life circumstances. This has been reflected within the structure and content of the Retail Asset Management programme.

The sector specific nature of the programme will specifically attract property and asset management based students and their employers. However additional students, who may not be in employment within this sector, or who may be in employment elsewhere, or be unemployed, and have a desire to study such programmes are potential targets. The programme has been so designed to cater for these eventualities by the use of;

- i. The use of synchronous and asynchronous activities;
- ii. The employment of 'Flip-Teaching' techniques;
- iii. Work experience facilitators;
- iv. Shadowing and other similar voluntary engagement;
- v. The use of International Case Studies;
- vi. The use of industry and region specific guest speakers;
- ix. Case studies and other examples of professional tasks derived from consultancy.

The majority of such opportunities will be arranged directly by the students concerned. However, this will be supported by UCEM's networks, including our alumni, which will be engaged where possible to connect students with potential work experience opportunities to allow skill and knowledge acquisition and to give heuristic opportunities for personal growth and maturity. UCEM's Virtual Learning Environment (VLE) contains a careers section which includes a job vacancy element The Portfolio of Learning from the Workplace is supported by the various mechanisms and resources mentioned above.

The opportunities to study for the FdSc Retail Asset Management remotely and whilst engaged in full-time employment, should act as strong incentive. The provision of case study materials and input from possible industry consultancy opportunities will be attractive to those not currently employed in the sector and potentially offers a new phase in the development of UCEM's provision.

The emphasis, after the compulsory Induction module (which must be completed by every UCEM student as a prelude to their chosen programme of study), is one in which modules are presented in a structured manner and study skills progressively introduced around academic and applied (work-related) topics. The essence of the Foundation Degree is that it is vocational, and students apply their studies within a work-related context wherever possible.

Module content has been mapped against the RICS Commercial Property Management Pathway for Associate Membership.

Assessment Strategy

Formative assessment

The purpose of formative assessment is to provide regular and constructive feedback to students to motivate and guide them through their learning. Formative assessment opportunities and feedback are provided on each module. These vary in format and may include self-assessment quizzes and tutor guided discussion. Students are encouraged to engage in group discussions and collaborative learning with their peers and tutors. A range of formative assessment activities are utilised to help develop the students' ability to

Foundation Degree Science (FdSc) in Retail Asset Management Programme Specification

investigate practical issues thoroughly and provide reasoned advice. All are designed to motivate and support the student. Formative assessment of the work based learning element is through regular reviews of, and feedback on, students' progress.

Where appropriate, both the workplace facilitator and the student receive review comments to help refine the students' work. Communication, collaboration and time management skills are tested through the range and requirements of summative assessment throughout the Foundation Degree (FdSc).

Summative assessment

Summative assessment methods and formats vary across the modules and include Computer Marked Assessments (CMAs), coursework, projects, portfolios and examinations. All are appropriate to the individual module, its academic level and stated learning outcomes. At this level, reflective thinking and critical analysis must be demonstrated. The programme seeks to adopt a supportive and engaging approach to assessment. At Level 4, the use of CMAs will be employed to encourage engagement with the VLE materials at an early stage. Subsequently at Level 5, examinations will be employed which will support the transition to this higher level of study. Work based learning is summatively assessed at the end of level 5 through the compilation of a portfolio of experience and reflection thereon.

Assessment Diet.

QAA Benchmark Mapping

The programme has been written to be cogniscent of the guidance in the QAA (2014) Qualifications Framework for Foundation Degrees.

The Foundation programme has also been informed by the latest QAA (2015) Characteristics Statement for Foundation Degrees.

QAA (2015), *Characteristics statement, Foundation Degree, September 2015, UK quality code for higher education, Part A: Setting and maintaining academic standards*, Gloucester: QAA [online].
