

Projects for Good

Wokingham Greenways Project

Wokingham Greenways are continuous generally traffic-free multi user routes that are aimed at linking the major Strategic Developments in the borough to each other and also to the existing communities and places of interest or employment. Greenways will provide non-car commuting journeys to work and school as well as new leisure opportunities to get out into the countryside. The Greenways Project also includes River Loddon Long Distance Path (LDP) that links the Thames Valley Path in the north of the borough in Wargrave to the Blackwater Valley Path in the South of the borough in Swallowfield.

Wokingham Greenways will contribute in achieving the National Government target to deliver better safety, better mobility and better streets by 2040. Linked to the Wokingham's Core Strategy (CP10 policy CP10 items 20 and 21 and SDL policies CP18-21), Greenways has also been highlighted in ROWIP 2020-30, Local Transport Plan and LCWIP (in progress).

The Project aims to fulfil the following Wokingham priorities:

- Invest in regenerating towns and villages, support social and economic prosperity, whilst encouraging business growth
- Ensure strong sustainable communities that are vibrant and supported by well-designed development
- Tackle traffic congestion in specific areas of the borough.

The project will be managed and delivered by Wokingham Borough Council Locality and Customer Services. The project delivery team includes the Project Board, Project Manager and Project delivery team constituting of members from various teams. The Project Manager in consultation with the Project Board and the delivery team will prepare and maintain the Project Plan to phase overall programming, consultation, communications and project implementation and oversee the detailed design. Core Project delivery team includes the Capital Project Manager, Highway Design Managers, and Strategic Engagement Officer.

The Project delivery team will meet regularly to monitor the progress and review design, cost and time objectives. This will include the monthly project coordination meeting and weekly project design meetings. The issue register will be maintained to capture and highlight all relevant project issues. The Communication Plan will detail out all internal and external communications. The Project Risk register will be used to help aid the management of project risk which will be reviewed on a monthly basis.
