

UNIVERSITY COLLEGE  
OF ESTATE MANAGEMENT

# Research Skills and Current Affairs

---

## Module Descriptor

Module Code: SUS7RSC

Version: V2.00

Status: Final

Date: 20/09/2023

# Summary Module Details

## Module details

**Module Title:** Research Skills and Current Affairs

**Module Leader:** Dr Hazel Ann Nash

**Module Mode:** Supported online learning

**Semester:** Spring (UK)

**Level:** 7

**Credits:** 10

**Learning Hours:** 100

## Contact & Study Hours

**Scheduled learning and teaching activities:** 16.5 hrs (16.5%)

**Guided independent study:** 83.5 hrs (83.5%)

## Assessment Type

**Coursework:** 100%

**Computer Marked Assessment:** 0%

**Self-directed Research Project:** 0%

**Portfolio:** 0%

## Module Summary

This module will enable students to develop the research skills required to navigate the evolving sustainability discourses from academia and practice, whilst informing their own Final Project (students will be made aware of the options available to them for semester 4 and the Final Project). Essential to the module will be understanding how to recognise assumptions, theoretical underpinnings, bias and what is and is not being privileged in various publication types. The fundamental assumptions upon which social science is founded will be outlined and debated. An understanding of level of analysis, micro, meso and macro will be explained. This will help students develop their critical thinking along with understanding the perspectives that make most sense to them. Operational practices around how to undertake research; forming a robust question, alternative approaches, along with data types and methods of data collection and analysis will be discussed.

## Taken on which Programmes

MSc Innovation in Sustainable Built Environments (C)\*

**Core (C) or Elective (E)**

\*This module is a pre-requisite for the Final Project Proposal (SUS7PRP) and must be studied before starting Year 2.

# Module Aim

This module aims to equip students with the necessary understanding, knowledge and skills to formulate a research problematic. This will be done through developing skills of critique around the current body of academic and grey (current affairs) literatures associated with sustainability.

# Module Learning Outcomes

- LO1. To have an understanding of what constitutes knowledge.
- LO2. To identify how knowledge is created and the methods available.
- LO3. To critique current affairs associated with sustainability through a rigorous understanding of a range of data collection and analysis techniques.
- LO4. Prepare students to implement research skills for future research projects (e.g. Final Project Proposal and Final Research Dissertation or Work-Based Project).

# Indicative Module Content

## Module topics

- Knowledge fundamentals – ontology, epistemology and methodology.
- Research problematic.
- Research objective.
- Research aim and objectives.
- Research design.
- Primary and secondary data – collection.
- Data analysis, findings and contribution to knowledge.
- Critique of research and current affairs using the above as touchpoints.
- Current and evolving discourse of sustainability.

This content will be reviewed and updated regularly to reflect the evolving body of knowledge regarding social science research.

# Overview of Summative Assessment

Module learning outcomes	Assessment	Word count or equivalent	Weighting	Minimum assessment threshold
LO1, LO2	<b>Assessment 1</b> Critique of research skills (e.g. critique a seminal research paper)	1,000 (word count equivalent)	40%	40%
LO1, LO2, LO3, LO4	<b>Assessment 2</b>	1,500 words max	60%	40%

## Research Skills and Current Affairs

	Briefing style ' video submission on approaches to sustainability research.			
--	---	--	--	--

**Module Pass Mark (as a weighted average of all assessments): 50%**

# Key Module Learning Resources

## Core Sources and Texts

The core reading resources within each module will be provided via the specific Virtual Learning Environment (VLE) module pages and within the e-Library. Additional reference material and supplementary resources to support your studies are available through the UCEM e-Library.

## Module tools

Students will have access to study materials, dedicated academic support, student forums, and learning activities via an online learning platform (VLE).

The module page on the VLE is broken down into structured study weeks to help students plan their time. Each week will have a key theme related to the module, drawing upon an evolving set of methods, including flipped learning with interactive workshops, discussions, online Padlet discussion activities for student unable to attend the live sessions.

Online tutorials/seminars led by specific academics can be attended in real time and provide opportunities to consolidate knowledge, ask questions, discuss topics and work through learning activities together.

These sessions are recorded to support students who cannot attend and to enable students to recap the session and work through with a degree of flexibility. Module forums on the VLE provide further opportunities to discuss topics with other students, complete collaborative work and get extra help from the module team.

## Professional online resources

The e-Library provides access to trusted, quality online resources, selected by subject specialists, to support students' study. This includes journals, industry publications, magazines, academic books and a dissertation/work-based library. For a list of the key industry specific and education resources available please visit [the VLE e-Library](#).

## Other relevant resources

Access is also provided to further information sources that include the British Library and Open University UK catalogues, as well as providing a monthly current awareness service entitled, **Knowledge Foundations** - a compendium of news, research and resources relating to the educational sector and the Built Environment.

The module resource list is available on the module website and is updated regularly to ensure materials are relevant and current.
